OFFICIAL PROJECT DOCUMENT / VERSION 1.2

Tokenomics. On record.

OFFCLOCK | Official Tokenomics & Public-Record Statement v1.2

≈1 billion	6	≈3.41%
OBSERVED TOTAL SUPPLY 999,999,999.999999 OFFC	DECIMALS Token-2022	NET STREAMFLOW VESTING One designated team wallet

FULL OFFICIAL TOKEN ADDRESS / SOLANA MINT

`69PtxdxaN7DdAttdAqkXJt2goCwMnzWLdyG4FLeGpump`

OFFCLOCK / OFFC · Solana mainnet.
Vesting created: 24 November 2026
Finalized observations: 19:13:10–19:13:25 UTC

Prepared at the OFFCLOCK project owner's request. Verification covers specified chain facts and arithmetic—not an audit, legal opinion, regulatory approval or guarantee of price or returns.

OFFC-TKN-2026-1124

offclockorigin.com

01 / TOKEN IDENTITY & ISSUANCE

One token. Exact identifiers.

OFFCLOCK is the project name; **OFFC** is the on-chain symbol. The full Solana mint below identifies the current token. Names, artwork and symbols can be copied and are not substitutes for the complete address. The mint is not a payment address. [1]

Project / token	OFFCLOCK / OFFC
Network / standard	Solana mainnet / Token-2022
Official token address	`69PtxdxaN7DdAttdAqkXJt2goCwMnzWLdyG4FLeGpump`
Token program	`TokenzQdBNbLqP5VEhdkAS6EPFLC1PHnBqCXEpPxuEb`
Observed total supply	**999,999,999.999999 OFFC**
Raw supply / decimals	999999999999999 / 6
Smallest decimal unit	0.000001 OFFC
Circulating supply	Not established by this verification.

Supply re-observed; unchanged

At **19:13:20 UTC on 24 November 2026**, finalized slot **473457394**, the supply response returned **999999999999999** raw units. Dividing by **10^6** yields **999,999,999.999999 OFFC**, unchanged from 22 November. “Approximately one billion” is a reading aid, not exactly one billion. This is total supply, not verified circulation or freely tradable supply. [1] [2] [8]

Authority roles recorded as null

Mint authority	Null · no further issuance through this role.
Freeze authority	Null · this role cannot freeze token accounts.
Metadata update	Null · this metadata-update role is revoked.
Metadata pointer	Null · this pointer-update role is revoked.

These four records are retained from the finalized **22 November 2026** mint observation at **15:59:25.618904 UTC**, slot **472599743**. The parsed extensions were **metadataPointer** and **tokenMetadata**. No transfer-fee configuration extension was observed; network charges and external venue fees may still apply. [1] [3] [4]

What revocation establishes

These null roles restrict their specific permissions. They do not certify security, guarantee liquidity or preserve externally hosted metadata. Total supply can still decline through token burns.

02 / VERIFIED DESIGNATED-WALLET VESTING

Team-wallet vesting (Streamflow)

At **19:01:14 UTC on 24 November 2026**, finalized slot **473454002**, the designated separate team wallet created Streamflow contract **"Dev"**. The contract account was decoded to verify its terms; the creation transaction and later balances are distinct finalized records. [8]

Net principal—not the entire escrow

34,134,347.893144 OFFC is subject to the vesting schedule: approximately **3.41%** of observed total supply. The escrow also holds **64,855.260996 OFFC** in Streamflow service fees; that fee is not an additional recipient vesting tranche.

Moved from team account	**34,199,203.154140 OFFC**
Net vested principal	**34,134,347.893144 OFFC** · share of total supply: 3.4134347893144033% (evidence display precision).
Streamflow service fee	64,855.260996 OFFC · 0.19% of net principal, truncated to token units; held in escrow.
Escrow balance	34,199,203.154140 OFFC · observed 19:13:10 UTC, slot 473457344, 24 Nov 2026.
Team account after	0.000001 OFFC · observed 19:13:25 UTC, slot 473457418, 24 Nov 2026.
Sender / recipient wallet	`HEfWKqBwHD3aphvNTcjC5pLWr2bmx92dKHKhqAeH3cry`
Source token account	`BTfNmPDNFyMdyst3EHZJ1uRGYLGb2uKcikDHXJmUdi6Q`
Vesting contract	`FWNHqMyNyGjqrjoUSadT1QYZjn2yoVddy3NSFwGifer8`
Escrow token account	`J7RthcbfB4nZpQb354gjWS9J9kDVgxghsV54E63a9uzT`
Streamflow program	`strmRqUCoQUgGUan5YhzUZa6KqdzwX5L6FpUxfmKg5m`

Creation transaction · 24 Nov 2026 19:01:14 UTC · slot 473454002

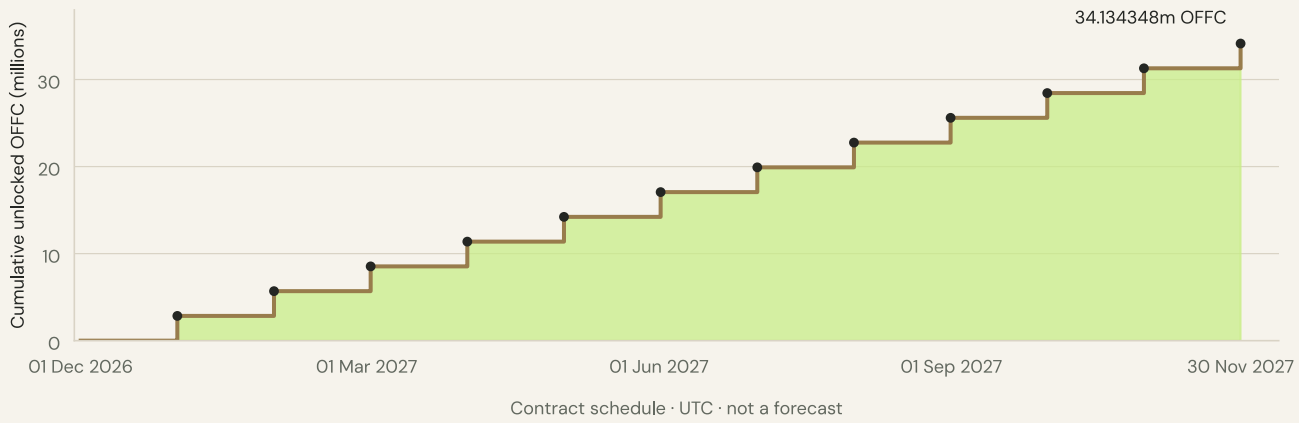
03 / THE CONTRACT UNLOCK SCHEDULE

Twelve unlocks. Exact dates.

Start and cliff: **1 December 2026, 00:00:00 UTC**; cliff amount: **0 OFFC**. The period is **2,627,994 seconds** (about 30.4 days), not a calendar month. First unlock: **31 December 2026, 09:59:54 UTC**. Fully vested: **30 November 2027, 23:58:48 UTC**. [8]



Contract schedule · all dates UTC · amounts in OFFC

No.	Unlock date / time (UTC)	Unlock amount	Cumulative unlocked
1	2026-12-31 09:59:54	2,844,528.991096	2,844,528.991096
2	2027-01-30 19:59:48	2,844,528.991096	5,689,057.982192
3	2027-03-02 05:59:42	2,844,528.991096	8,533,586.973288
4	2027-04-01 15:59:36	2,844,528.991096	11,378,115.964384
5	2027-05-02 01:59:30	2,844,528.991096	14,222,644.955480
6	2027-06-01 11:59:24	2,844,528.991096	17,067,173.946576
7	2027-07-01 21:59:18	2,844,528.991096	19,911,702.937672
8	2027-08-01 07:59:12	2,844,528.991096	22,756,231.928768
9	2027-08-31 17:59:06	2,844,528.991096	25,600,760.919864
10	2027-10-01 03:59:00	2,844,528.991096	28,445,289.910960
11	2027-10-31 13:58:54	2,844,528.991096	31,289,818.902056
12	2027-11-30 23:58:48	2,844,528.991088	34,134,347.893144

Equal-rate periods; final raw-unit adjustment

The first 11 unlocks each release **2,844,528.991096 OFFC**. The final unlock releases **2,844,528.991088 OFFC**, 0.000008 less, so the cumulative sum equals the exact net principal. The chart depicts the contract schedule, not a forecast of price or returns. Top-up is allowed; the displayed schedule is for the observed principal.

04 / PERMISSIONS, HISTORY & SCOPE

A lock with defined boundaries.

The decoded contract records the following flags. **Withdrawn so far: 0 OFFC** at verification. Automatic withdrawal is enabled; this flag does not prove a future withdrawal has occurred or guarantee service operation. [8]

Sender cancellation	Not allowed · non-cancelable by sender.
Recipient cancellation	Not allowed · non-cancelable by recipient.
Sender transfer	Not allowed · non-transferable by sender.
Recipient transfer	Not allowed · non-transferable by recipient.
Pause / rate update	Not pausable; unlock rate cannot be updated.
Automatic withdrawal	Enabled.
Top-up	Allowed · more tokens could be added to the lock.
Recipient	The same designated team wallet as the sender. Each unlocked tranche becomes available to that wallet.

Historical wallet balance—superseded by vesting

On **22 November 2026 at 15:59:34.467565 UTC**, finalized slot **472599785**, the wallet-scoped query returned one OFFC token account with **34,199,203.154141 OFFC**, approximately **3.42%** of total supply. A direct account cross-check at **15:59:37.811919 UTC**, slot **472599801**, confirmed that balance. These remain historical observations, not the current unlocked wallet balance. [1]

The **24 November 2026 vesting supersedes that balance disclosure**: **34,199,203.154140 OFFC** moved into escrow, leaving **0.000001 OFFC** in the measured team token account. The historical balance reconciles exactly to the transfer plus that residual. The vesting principal excludes the service fee.

One designated wallet—not all related holdings

"Team wallet" is the project owner's designation, not independently established legal or beneficial ownership. This disclosure covers **one designated wallet and its stated OFFC account only**. Aggregate creator/team or related-party holdings, other wallets, circulating supply and freely tradable supply are **not established**. The residual account balance is not proof that the team collectively holds only 0.000001 OFFC.

Honest scope

Verification covers finalized chain facts and arithmetic only. It is not an independent audit, legal opinion, regulatory approval or guarantee of price or returns. Non-cancelable vesting restricts contract permissions; it does not prove security, aggregate insider exposure or future market behaviour. Unlocked tokens become available to the same team wallet.

05 / ECONOMIC ROLE & CURRENT DISCLOSURES

Product use and token exposure remain separate.

OFFC is a community meme coin. Origin is the project's browser-local file-integrity tool. Its published version selects local files, calculates native SHA-256, compares a reference and exports or imports an unsigned passport. It does not require OFFC holdings, a wallet connection, an account or payment. File integrity is a software function, not a token-holder entitlement. [5] [6]

What the published project does—and does not—commit

The implementation and whitepaper referenced in v1.1 do not implement or commit token-holder governance, staking, yield, revenue entitlement or holder rewards. Acquiring OFFC does not confer ownership of the project, software, intellectual property or income under those disclosures. Product adoption does not guarantee token demand or value. These project disclosures are retained from v1.1, not newly independently audited. [5]

Broader allocations	Not established. No fabricated marketing, treasury, ecosystem, airdrop or community percentages are assigned.
Aggregate related holdings	Not established beyond the stated designated wallet/account.
Vesting / token locks	One verified Streamflow contract, as disclosed on pages 3–5. No broader lock claim is made.
Circulating supply	Not established; total supply is not a free-float measure.
Liquidity lock / reserves	Not verified here. No price, liquidity, locked-share or guaranteed-exit figures are asserted.
Independent security audit	No independent audit in the project disclosure referenced in v1.1; this document is not an audit.
Team identity	Anonymous, as project-disclosed; legal operator particulars remain unresolved.

External venue review references

Review OFFC on Pump.fun is retained as the project-published reviewed venue. Review OFFC on Jupiter preselects **SOL / OFFC** for independent external review; review its token warnings. These references do not establish an endorsed listing, verified liquidity, an executable quote or continuing trade availability. Quotes, charges, venue conditions and wallet approvals require independent review. This PDF does not place, sign or approve transactions. [5] [7]

Material risk notice

Meme coins are speculative and may lose all value. Liquidity, execution, smart-contract and third-party platform risks remain. No returns, holder rewards, capital protection, legal classification or regulatory approval are guaranteed. This is an informational project statement, not investment, legal or tax advice.

06 / THE VERIFICATION RECORD

Public facts. Traceable records.

"Verified" means the specified fields were recorded from finalized Solana mainnet data, including decoding the Streamflow contract account, and the arithmetic was checked. The v1.2 build uses the supplied evidence record; it does not claim a new live retrieval or independent audit. [1] [8]

Finalized record	Date / time · UTC	Slot
Mint / four authority roles	22 Nov 2026 · 15:59:25.618904	472599743
Historical wallet balance	22 Nov 2026 · 15:59:34.467565	472599785
Vesting creation transaction	24 Nov 2026 · 19:01:14	473454002
Escrow token balance	24 Nov 2026 · 19:13:10	473457344
Escrow account information	24 Nov 2026 · 19:13:14	473457372
Supply re-observation	24 Nov 2026 · 19:13:20	473457394
Team token account residual	24 Nov 2026 · 19:13:25	473457418

Endpoint: https://api.mainnet-beta.solana.com · finalized commitment. Balance and supply times are response-retrieval times (displayed to the second for 24 Nov); creation time is transaction block time. Records are at separate slots, not one atomic snapshot. Integer raw units, not floating-point UI amounts, underpin the arithmetic.
